Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claims 1-9**, drawn to a method for transacting an anonymous purchase using a computer-implemented purchasing system, classified in class 705, subclass 26.
 - II. **Claims 10-14**, drawn to a computer-implemented purchasing system for transacting an anonymous purchase, classified in class 706, subclass 26.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the step of acquiring intermediary credit account information from a purchasing intermediary as claimed in the method claim 1 could be performed by an alternative purchasing system to that of the system claim 10: for example, the purchaser could buy a purchasing card at a bricks and mortar store and is not limited to an on-line acquisition of the intermediary credit account information in response to the on-line receipt of the purchasers credit account information, as is the case in the system of claim 10.

3. Because these inventions are distinct for the reasons given above and the search required for Group I and Group II are divergent and share only a partial overlap, restriction for examination purposes as indicated is proper.

Art Unit: 2164

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A; figs. 3, 4A and 4B, claims 2-4.

Species B; fig. 5, claims 5 and 6.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 7, 8 and 9 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 2164

the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.

5. A telephone call was made to Richard L. Carlson on 1/17/01 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

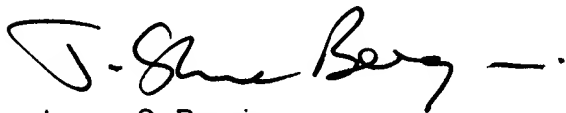

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James S. Bergin whose telephone number is 703 308-8549. The examiner can normally be reached on Monday-Thursday 8.30-6.00 and on alternate Fridays.
